Frontend Developer passionate about building responsive, scalable, and user-friendly web applications with React, Next.js, TypeScript, and Tailwind CSS. Experienced in developing reusable UI components, integrating REST APIs, implementing authentication, and managing application state using Zustand and Redux Toolkit. Enjoy working in collaborative team environments, solving real-world problems, and continuously learning modern frontend technologies to deliver clean, maintainable, and high-quality software.

Professional Experience

Nova / Frontend Developer

07/2025 – Present
Shiraz, Iran

- Develop responsive web applications using React, Next.js, TypeScript, and Tailwind CSS for client projects.
- Build reusable UI components and implement features across product, cart, authentication, filtering, and checkout flows.
- Integrate REST APIs using TanStack Query, handling caching, mutations, pagination, loading states, and error handling.
- Manage shared application state with Zustand for features such as cart, authentication, and product filters.
- Participate in pull request reviews, bug fixing, and collaboration with backend developers to deliver reliable and maintainable features.
- Work with Git and GitHub in a team-based workflow while following clean code and modern frontend practices.

Nexo / Frontend Developer

03/2025 – 06/2025
Shiraz, Iran

- Contributed to the development and maintenance of frontend applications using React, Next.js, TypeScript, and Tailwind CSS.
- Developed responsive and reusable UI components following a component-based architecture.
- Integrated REST APIs, implemented new features, and fixed application issues across different parts of the applications.
- Worked on responsive interfaces and frontend functionality with a focus on usability and consistent user experience.
- Collaborated with backend developers and other team members throughout the development process.
- Followed Git-based development workflows, clean code principles, and modern frontend practices.

MindaTech / Frontend Developer Intern

10/2024 – 02/2025
Shiraz, Iran

MindaTech is a data-driven AI startup focused on collecting information from external sources and building intelligent solutions tailored to client needs.

- Collaborated with the data and AI teams to design and develop interactive web dashboards visualizing real-time analytics and insights.
- Integrated frontend components with REST APIs serving AI-driven insights from external data sources.
- Gained hands-on experience working in a startup environment focused on AI-based product development and data visualization.

Education

Bachelor of Electrical and Electronics Engineering, *Shahrood University of Technology*
Designed and implemented the **ADS1293 ECG acquisition module** as a team project.

09/2017 – 07/2021

Skills
