ABOUT ME

Junior Front-End Developer with hands-on experience building responsive, RTL web applications using Next.js, TypeScript, Tailwind CSS, and Prisma. Skilled at building reusable, animated UI components (Framer Motion, cva) within an established design system, integrating APIs, and debugging cross-breakpoint responsive layouts.

EXPERIENCE

Front-End Developer

Team Project

- Owned the site's navbar system: built the HamburgerMenu/MegaMenu component (component, types, variants, and a custom hook) plus a NavbarWrapper for layout integration
- Converted the navigation modal from desktop-only to fully responsive across mobile, tablet, and desktop; solved a fixed-positioning bug with createPortal and used dynamic viewport height (h-dvh) for mobile
- Built a glass-effect header for the homepage that switches to a solid background on scroll, coordinating scroll state and styling across three components
- Created reusable Button variants with class-variance-authority (cva), resolving Tailwind class conflicts and TypeScript prop typing issues
- Debugged responsive layout issues across footer and navigation components, including RTL-specific icon alignment fixes
- Built login/register authentication features with React Hook Form, Zod validation, and TanStack Query, following a three-layer UI / hook / schema architecture
- Converted SVG icons into reusable React components following a strict project convention

EDUCATION

Bachelor's Degree in Computer Engineering - Software Engineering

Shiraz, Iran

Islamic Azad University, Shiraz Branch

TECHNICAL SKILLS

Core Technologies

HTML5, CSS3, JavaScript (ES6+), TypeScript

React Concepts

React Hooks, Props, State Management, class-variance-authority (cva)

Form and Data Management

React Hook Form, Zod, TanStack Query

Development Tools

Git, GitHub, VS Code, pnpm, npm

Frameworks and Libraries

React.js, Next.js, Tailwind CSS, Framer Motion

Architecture

Server Components & Client Components

Backend and API

Prisma ORM, PostgreSQL (Basic), API Integration

Methodologies and Design

Reusable Components, Component Architecture, Responsive Design, RTL Layout

LANGUAGES

Persian

Native

English

Technical Reading

PROJECTS

Blog Platform

Next.js + TypeScript

Developed a responsive blog platform with dynamic data management.

- Database data fetching using Prisma
- Dynamic article cards
- Grid/List view switching
- Filtering and sorting system
- Pagination
- Reusable UI components
- Responsive layout
