Summary

Frontend Developer experienced in building responsive and scalable web applications using React, Next.js, TypeScript, and Tailwind CSS. Skilled in developing reusable components, integrating REST APIs, implementing authentication, managing application state, and translating Figma designs into modern user interfaces. Experienced in systematically troubleshooting frontend issues by tracing unexpected behavior across components, dependencies, API responses, and application state to identify root causes and implement reliable, maintainable solutions. Passionate about writing clean, maintainable code with a strong focus on performance, SEO, and user experience. Enjoy collaborating closely with cross-functional teams, particularly UI/UX designers, to suggest design improvements, identify technical constraints, and develop practical solutions. Continuously learning modern frontend technologies and best practices while solving real-world challenges.

Professional Experience

Front-End Developer, Nova

07/2025 - Present | Shiraz, Iran

Built responsive web applications with React, Next.js, TypeScript, and Tailwind CSS. Developed reusable components, integrated REST APIs, and implemented authentication. Contributed to admin dashboard, e-commerce, and user profile applications. Wrote clean, maintainable code and collaborated with cross-functional teams.

Front-End Developer, Nexo

03/2025 - 06/2025 | Shiraz, Iran

Contributed to the development and maintenance of frontend applications by building responsive interfaces, fixing bugs, implementing new features, and integrating REST APIs. Worked with React, Next.js, TypeScript, and Tailwind CSS while following component-based architecture, clean code practices, and collaborating with cross-functional teams to deliver high-quality user experiences.

Education

Bachelor of Software Engineering, National University of Skills - Shiraz Girls Technical Campus (Al-Zahra)

2020 - 2025 | Shiraz, Iran

Studied software engineering fundamentals including programming, software development, databases, algorithms, and web technologies. Developed practical skills in frontend development and software engineering concepts.

Skills

Frontend

• HTML5, CSS3, Sass • JavaScript (ES6+), TypeScript • React.js, Next.js

Architecture

• Component-Based Architecture • Feature-Based Architecture • Modular Architecture • Reusable Component Design

UI & Design

• Tailwind CSS • shadcn/ui • Storybook • Material UI • Bootstrap • Responsive Design

Development Tools

• Git • GitHub • Jira • Postman • Swagger • ESLint • Prettier

State Management

• TanStack Query (React Query) • Zustand • Redux Toolkit • Context API

API & Authentication

• REST APIs • Axios • JWT Authentication

Forms & Validation

• React Hook Form • Zod • Yup

Rendering & Performance

Server-Side Rendering (SSR) • Static Site Generation (SSG) • Incremental Static Regeneration (ISR) • Code Splitting • Lazy Loading • Image Optimization • Skeleton Loading

Languages

English

B2 (Upper-Intermediate)
