📄 Summary

I'm a Front-End Developer with over **4 years of experience** building modern web applications. I enjoy turning ideas into products that are not only functional, but also fast, maintainable, and enjoyable to use.

I like taking **ownership** of the products I work on rather than focusing only on assigned tasks. I enjoy working closely with designers and backend developers, sharing ideas, solving problems, and improving products beyond the initial requirements. I care about **clean architecture, reusable components, performance, SEO, and design systems**. I'm always looking for better ways to build software and enjoy learning new technologies that help me deliver higher-quality products.

💼 Professional Experience

Nova, Technical Lead & Frontend Engineer Shiraz, Iran | 05/2026 – Present

- Leading frontend development across multiple products while defining architecture, reviewing code, and coordinating engineering workflows.
- Building scalable frontend systems with reusable components, design systems, Storybook, and modern collaboration tools including Jira and Git.
- Driving the development of AI-powered platforms for restaurants and shopping malls, contributing to frontend architecture, APIs, and technical planning.

Mana Takapo, Frontend Engineer Shiraz, Iran | 11/2025 – 07/2026

- Developed a web and cross-platform mobile application for beauty salons and clinics using Next.js and React Native.
- Designed a shared monorepo architecture with reusable components and feature-based organization to improve scalability and maintainability.
- Optimized data fetching with React Query and collaborated closely with designers and backend developers to deliver a consistent user experience.

Dotwebify, Founder & Frontend Engineer Shiraz, Iran | 10/2024 – 05/2025

- Founded and led a distributed frontend team, delivering web applications from concept to deployment.
- Built scalable e-commerce platforms, CMS solutions, and corporate websites with a focus on performance, SEO, and maintainable architecture.
- Led the development of an AI-powered shopping mall platform while managing team workflows and collaborating directly with clients.

Selected Projects

- Det Leather** — E-commerce platform for a leather manufacturer.
- Edliya** — Fashion e-commerce platform with a custom ordering workflow.

PerfectLink, Front-End Developer London, UK | 12/2023 – 07/2024

- Developed two international websites and their CMS using Next.js and TypeScript.
- Built advanced GSAP animations and implemented cloud-based media management with S3-compatible storage and Cloudinary.
- Contributed to backend APIs, PostgreSQL/Prisma, deployment, and migration from Linux VPS to Vercel.

Nexo IoT Company, Front-End Developer Shiraz, Iran | 06/2022 – 11/2023

- Developed web applications for a smart home ecosystem, including the corporate website, CMS, CRM, warehouse management system, and IoT dashboard.
- Built responsive interfaces with a strong focus on performance, SEO, and custom CSS animations.
- Collaborated with backend developers to integrate REST APIs for smart device management within an 8-member cross-functional team.

🎓 Education

Windows Application Development C# Shiraz, Iran | 11/2020 – 04/2021
South Industrial Management Institute

Bachelor's Degree in Aerospace Engineering Shiraz, Iran | 09/2013 – 07/2017
Payame Noor University

🌐 Languages

ENGLISH — Intermediate (Improving toward IELTS) | **DEUTSCH** — Basic working knowledge (Previously studied to B1)

🛠 Skills

Frontend:

HTML, CSS, Sass, JavaScript, TypeScript, React.js, Next.js, React Native.

Architecture:

Component Architecture, Modular Architecture, Feature-based Architecture, Reusable Component Design.

State Management:

Redux, Zustand, Context API.

UI & Design Systems:

Tailwind CSS, Shadcn/UI, Material UI, Bootstrap, Storybook, Responsive Design, Design Systems, Figma Collaboration.

Animation:

GSAP, Framer Motion.

Forms & Validation:

React Hook Form, Formik, Zod, Yup.

Backend Integration:

REST APIs, GraphQL, Axios, PostgreSQL, Prisma, Drizzle ORM, JWT Authentication.

DevOps & Deployment:

Linux VPS, Vercel, CI/CD (GitHub Actions).

Cloud Services:

S3-Compatible Object Storage, Supabase, Firebase, Cloudinary.

Performance & SEO:

SSR, SSG, ISR, Image Optimization, Code Splitting, Lazy Loading, Accessibility (WCAG).

Tools & Workflow:

Git, GitHub, Jira, Notion, Trello, Postman, Swagger, ESLint, Prettier, Strapi, Webpack.
